John Mallery presents outgoing Chairman Jon Gann an award for his hard work in 2003.

From the Chair...

John Mallery, KC ASIS Chairman

As I sat in the audience and watched the past chairmen be recognized at our December meeting, a sudden fear crept over me, "How can I follow in the footsteps of these knowledgeable and talented individuals?" It is certainly a great privilege and honor to serve as the Chapter Chairman for the Kansas City Chapter of the American Society for Industrial Security. I would like to start 2004 by thanking the membership for the opportunity to serve.

I would also like to thank the 2003 Board, Committee Chairs and volunteers for providing such excellent service to our chapter.

During 2004, I would like to continue some of the work initiated by our recent chairman, Jon Gann and his team. Jon succeeded in turning our chapter's web site into a viable resource for the organization. I would like to continue adding to the web site so that it becomes one of the primary security resources for our members.

I would also like to see us develop working relationships with other security-related organizations in the Kansas City area. Not only is this a desire of ASIS International, it is an excellent way for us to network and learn from other security professionals. Such groups include, MO-KAN High Technology Crime Investigation Association, Infragard, Information Systems Security Association and Certified Fraud Examiners, to name a few. Networking with these organizations can help with attendance at our fall conference as well as boost membership.

Some of you may be concerned that some of these organizations are geared toward the "IT" security professional. One of the other things I would like to provide to the organization is to be a resource for those physical security professionals who wish to take some steps toward understanding computers and computer technology.

I look forward to serving the membership with the following board members:
